## **Present position**

---

- 50% Full Professor in Cognitive Neuroscience (Professore Ordinario, SSD M-PSI/02), Area of Neuroscience, SISSA, Trieste (Italy).
- From Nov 2nd - 2022 - 50% Full Professor (Professore Ordinario, SSD M-PSI/02), Dipartimento di Medicina dei Sistemi, Università Roma - Tor Vergata, Roma, Italy, where I am the Coordinator of the undergraduate studies program 'Psicologia generale, dello sviluppo, del genere e del comportamento sociale'.
- This joint appointment is within the agreement between SISSA and Università Roma - Tor Vergata (art. 6 comma 11, LEGGE 30 dicembre 2010, n. 240).

## **Brief summary of my research interests**

---

For many years I investigated language, memory, perception and action in healthy and in brain damaged individuals. My main findings were that the motor system is involved in many more higher-level cognitive processes than once thought. In recent years, I have been promoting a new research program with two main strands. The first aims at identifying the cognitive and non-cognitive factors that influence educational attainment in university students as well as their neurophysiological correlates with a particular focus on numeracy. The second strand concerns the role of cognitive reserve and its neural underpinnings in accounting for individual differences in individuals with either normal or pathological ageing, as well as in individuals affected by other neurological pathologies.
